

transponder and reader engineered systems

To Whom It May Concern,

Transponder & Reader Engineered Systems, Inc in being a leader in the RFID/AVI industry was looking to again provide high-value training for our industry professionals by developing an in-depth, professional training program. We wanted a program more comprehensive and throughout to be a superior value to those we provide our training to.

As with many of the "firsts" that TRES has brought to our industry, a solid and complete (CEU qualified) training program was what we were seeking. After much research we came upon The CMOOR Group of Louisville, KY to partner with us to reach this goal.

Connie Moorhead, President of The CMOOR Group lead their efforts to work with us to develop this cutting-edge course curriculum along with the additional documentation that makes our course the standard bearer program for RFID/AVI training above any other.

Transponder & Reader Engineered Systems, Inc is pleased and proud to announce that our goal has been achieved with The CMOOR Group and their highly professional and thorough performance in creating a solid course, with full documentation and testing production. We would recommend The CMOOR Group to any group looking to achieve a high level of quality with their training courses.

We look forward to working with CMOOR Group on future projects of this nature as well.

Respectfully,

A handwritten signature in blue ink that reads "Steven M. Hale". The signature is fluid and cursive, written over a light blue horizontal line.
